

Real Experience. Real Training. Real Results. SM

**Mobile Elevating Work Platforms (MEWP)  
Operator Safety Training  
ANSI A 92.22 & A92.24**

**Applicability:** Applies to persons engaged in the design, maintenance, use and operation of MEWP'S (Mobile Elevating Work Platforms (e.g., Scissor Lifts, Boom Lifts, Manlifts.)) Formally Known as AWP Aerial Work Platforms.

**Prerequisites:** None

**Frequency and Duration:** This training program requires 4 to 6 hours (Depending on participants skillset and experience) to complete, and Refresher training is required every 3 years.

**Purpose and Overview:**

Safety Training Services, Inc. will conduct (OST) Operator safety training or (RST) Refresher safety training required by ANSI Standards A92.22 & A92.24, to persons engaged in the operation, use and maintenance of Self-Propelled Scissor Lifts and or Boom-Supported Elevating Work Platforms Lifts (Telescoping or Articulating) electrically powered or by internal combustion engine.

Operators will be trained and tested (written and practical) in the safe operation of both Scissor & Boom Lift related tasks/topics such as the following;

- The purpose, use & location of manuals
- Proper storage of maintenance & operating manuals
- A Pre-start inspection of the MEWP (8.3)
- Workplace Inspection prior to operating the MEWP
- Responsibilities associated with problems or malfunctions affecting operation of the MEWP
- Factors affecting stability
- The purpose of placards & decals
- Safety rules & regulations
- Authorization to operate the MEWP
- Identification of hazards associated with operation of the MEWP
- Operating warnings and instructions
- Demonstration of proficiency in the operation of the MEWP
- Perform MEWP Workplace Risk Assessment
- Perform MEWP RESCUE Plan

**Training Materials: Those attending this training program will receive a training manual and Photo ID wallet card; that will be awarded to the student upon successful completion of the training course.**
